

ASSOCIATE/ SENIOR ARCHITECT

JOB

DESCRIPTION

GPAD

GPAD is an energetic and thoughtful architecture practice, creating buildings with a sense of place and purpose.

We're personable, practical, and passionate.

We like to make things easy for our clients; establishing strong relationships and crafting considered spaces.

WHAT WE DO

We focus on workplace and housing at a range of scales.

Our approach to workplace design has been recognised through industry awards such as BCO, FX and International Property. Much of this work is retrofit and we enjoy understanding the character of a place and building and celebrating this through reuse.

Our residential work spans from one off contemporary houses and infill schemes to new parts of the city and suburbia. No matter the scale, we focus on creating homes and communities that people want to live in.

Our work responds to it's context and recognises its contribution to placemaking and the environment. We're dedicated to creating buildings that consider the climate and biodiversity, and focuses on people's wellness to promote an inclusive, healthy and stimulating environment.
