

PART II
ARCHITECTURAL
ASSISTANT
JOB
DESCRIPTION

GPAD

GPAD is an energetic and thoughtful architecture practice, creating buildings with a sense of place and purpose.

We're personable, practical, and passionate.

We like to make things easy for our clients; establishing strong relationships and crafting considered spaces.

WHAT WE DO

We focus on workplace and housing at a range of scales.

Our approach to workplace design has been recognised through industry awards such as BCO, FX and International Property. Much of this work is retrofit and we enjoy understanding the character of a place and building and celebrating this through reuse.

Our residential work spans from one off contemporary houses and infill schemes to new parts of the city and suburbia. No matter the scale, we focus on creating homes and communities that people want to live in.

Our work responds to it's context and recognises its contribution to placemaking and the environment. We're dedicated to creating buildings that consider the climate and biodiversity, and focuses on people's wellness to promote an inclusive, healthy and stimulating environment.

JOB SPECIFICATION

Come join our friendly multi-disciplinary studio in central London to work on one of our exciting residential or workplace projects.

Job Title: Part II Architectural Assistant

Reports to: Architect/Associate

ROLE: SKILLS & EXPERIENCE

1. Early stage design-led residential and/or workplace experience is essential (RIBA stages 0-3).
2. Appetite for low carbon design and reuse.
3. Strong design skills and fluency in digital and hand drawing with Vectorworks and Sketchup experience preferred.
4. Good oral and written communication skills and comfortable in dialogue with clients, consultants, contractors and collaborators.
5. Assisting project lead through all work stages of a project from design to delivery.
6. Comfortable working on more than one project at once.
7. Clear understanding of project brief and working to the agreed time frame and budget.
8. Ability to understand design decisions taken by others and work collaboratively within a larger project team.
9. Evidence of construction knowledge and later work stage experience (RIBA 4-6).
